

DEEPANSHU VERMA

Software Developer (MERN Stack)

CONTACT

Phone: +91 86278 09343

Email: vermadeepanshu123@gmail.com

Location: Vill. Bag, VPO Grouru (Gaddidhar), Sub Teh. Tihra, Distt. Mandi (H.P) 175026

PROFILE

Accomplished MERN Stack Developer with over **4+ years** of professional experience designing, building, and maintaining high-performance web applications. Expert in crafting responsive user interfaces with React.js, developing robust server-side services using Node.js and Express, and customizing marketplace solutions on Sharetribe Flex. Proficient with MongoDB, RESTful APIs, and AWS services (S3, EC2, RDS). Known for writing clean, maintainable code, optimizing performance, and collaborating seamlessly in agile, cross-functional teams. Passionate about continuous learning and driving innovation with best practices and modern frameworks.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Next.js, Material-UI

Backend: Node.js, Express.js, Sharetribe Flex (Marketplace Customization)

Databases & Tools: MongoDB, SQL/RDBMS, AWS (S3, EC2, RDS), Retool

Version Control & CI/CD: Git, GitHub

WORK EXPERIENCE

2024 – Present | Devs Crew

Software Developer

- Developing and maintaining custom marketplace features on Sharetribe Flex alongside MERN-stack applications.
- Architecting React-based frontends with dynamic, component-driven interfaces.
- Building Express/Node.js microservices and integrating RESTful endpoints.
- Collaborating on end-to-end delivery: from wireframes and API design through testing and deployment.

2022 – 2024 | Smart Info Care Solutions

Software Developer

- Developed and maintained full-stack web applications using MERN stack, ensuring high performance and responsiveness.
- Implemented RESTful APIs to facilitate seamless communication between client and server.
- Optimized React components for maximum performance across devices and browsers.
- Integrated third-party services and APIs to enhance application functionality.
- Conducted code reviews, improved CI/CD pipelines, and ensured best practices in version control.

2019 – 2022 | AgVa Healthcare

Network Engineer

- Designed, implemented, and maintained secure, high-availability network infrastructures.
- Configured routers, switches, firewalls, and other networking equipment to meet organizational needs.
- Monitored network performance, executed optimizations to reduce downtime, and conducted audits for compliance.

PROJECT WORK

- **VacanzaStays:** Short- & long-term homestays marketplace (React.js, Node.js)
- **NEXTMED:** Medical assistant platform (Next.js)
- **ShapeShopp:** Personalized online clothing marketplace (React.js)

EDUCATION

Shoolini University

Bachelor of Technology, GPA: 7.0 / 10

2015 – 2019
